

ABSTRACT

Disclosed is a surface treating agent containing fluorine-containing polymer having:

- 5 (A) a repeating unit derived from a fluorine-containing compound which is represented by the following formula:

(wherein X is a hydrogen atom or a methyl group),

- (B) a repeating unit derived from a monomer containing no
10 fluorine atom, if necessary and (C) a repeating unit derived from a crosslinkable monomer, if necessary. This surface treating agent has excellent water repellency, oil repellency and antifouling property.
